

FABIANO INÁCIO

Principal Engineer | Microsoft Technologies • Windows Internals • Security & Compliance

Sapiranga, RS – Brazil • (51) 99733-7427 • fginacio@gmail.com • [linkedin.com/in/fabianoinacio](https://www.linkedin.com/in/fabianoinacio)

PROFESSIONAL SUMMARY

Principal Engineer with nearly 20 years of experience supporting Microsoft technologies within Dell Technologies and Microsoft environments. Acts as a trusted technical escalation lead for complex enterprise incidents, partnering directly with Microsoft product groups, Dell engineering teams, and strategic customers to diagnose, replicate, and resolve critical issues across Windows Internals, Azure Local, Clustering, Hyper-V, Security, and Compliance. Combines deep technical expertise with strong business awareness, helping restore service continuity, reduce operational risk, and provide executive-level confidence during high-impact situations involving leadership, directors, and business stakeholders. Recognized for evidence-based troubleshooting, structured problem solving, and clear communication in both English and Portuguese.

CORE COMPETENCIES

- Microsoft Defender for Endpoint (MDE)
- Azure Local / Storage Spaces Direct
- KQL (Advanced Hunting) & PowerShell
- L3 Escalations & Critical Situations
- Windows Internals & Kernel Debugging
- Hyper-V & Windows Failover Clustering
- Performance Analysis (WPR, MPLog)
- Bilingual Communication (EN / PT)

PROFESSIONAL EXPERIENCE

MICROSOFT

Technical Support Engineer — Security & Compliance (Microsoft Defender for Endpoint)

Mar 2026 – Jul 2026

- Leveraged nearly 20 years of enterprise Microsoft support experience gained at Dell Technologies to provide advanced technical leadership for Microsoft Defender for Endpoint (MDE) and the broader Security & Compliance ecosystem, supporting strategic and global enterprise customers.
- Led investigation and resolution of complex security incidents impacting enterprise environments, driving rapid service restoration through advanced diagnostics, PowerShell automation, and Advanced Hunting with KQL.
- Collaborated directly with Product Group (PG), engineering teams, and customer stakeholders to resolve business-critical cases requiring executive visibility and cross-functional coordination.
- Supported complex environments and third-party integrations while maintaining structured escalation management, technical documentation, and Microsoft support quality standards.

DELL TECHNOLOGIES

Microsoft Principal Engineer — Solutions Support Team (SST)

Jul 2016 – Feb 2026

- Served as the senior technical escalation leader for Microsoft-related technologies within Dell Technologies, supporting global enterprise customers operating business-critical environments where infrastructure outages and service disruptions had direct impact on operational continuity, customer-facing services, and business objectives.
- Led resolution efforts for high-severity incidents across mission-critical enterprise environments, including production-down events, clustering failures, virtualization platform disruptions, and service outages requiring close coordination with Microsoft engineering teams, Dell product organizations, customer leadership, and executive stakeholders to rapidly restore critical business services.

Senior ProSupport Engineer, Microsoft — LATAM

Jul 2014 – Jul 2016

- Microsoft Senior Engineer (Level II) focused on Microsoft and IDM solutions, providing technical support and escalation handling for Enterprise customers across all of Latin America.

NOS (Network Operating System) Advisor

Jun 2011 – Jul 2014

- L2 Software Support Engineer with experience training and mentoring L1 teams on Microsoft and Dell solutions; former instructor for the Student 2 Business Advanced (S2DBA) program.
- Provided technical support for Microsoft, IDM, Symantec, and AppAssure solutions.

Technical Support Storage Senior Analyst

Jun 2010 – Jun 2011

- Supported storage and backup environments, handling incidents involving EMC, EqualLogic, and tape technologies; experienced with switches, HBAs, NavSphere, PowerPath, and EqualLogic tools.
- Supported backup applications including CommVault, ArcServe, Backup Exec, NetBackup, Tivoli, DPM, and Legato; served as technical point of contact for Backup Exec within the storage team.

Technical Support Analyst

Nov 2008 – Jun 2010

- Provided hardware and software support for Windows Server environments, diagnosing and resolving operating system and server infrastructure issues.

Technical Support Specialist

Nov 2007 – Nov 2008

- Provided hardware support for enterprise environments, focusing on diagnosing and resolving server infrastructure issues.

EDUCATION

Degree in Computer Science

2000 – 2008

Universidade Feevale — Novo Hamburgo, RS
